911 Outages/Remote/Community Isolations:

- None reported

Service Interruptions:

- None reported

WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Nothing significant to report.

SOUTHERN CALIFORNIA

- An approaching cold front combined with increasing instability will bring a threat of thunderstorms to the coastal waters of Southwest California tonight through Saturday morning.
 - Some of these thunderstorms will likely come ashore across coastal and valley areas, mainly south of Point Conception.
 - The thunderstorm threat will begin across Santa Barbara County this evening, spreading to Ventura and Los Angeles Counties overnight.
 - Any thunderstorms that develop will bring the potential for brief heavy downpours, locally damaging wind gusts up to 50 mph, small hail, and dangerous cloud to ground lightning.
 - Peak rainfall rates between 0.50 and 0.75 inches per hour will be likely with this system, and could be locally higher directly under thunderstorms. Conditions will also be favorable for isolated waterspouts and funnel clouds.
 - The heaviest rainfall is expected to occur across Santa Barbara and western Ventura counties (including the Thomas Fire burn area) between 2100 and 0200 hours tonight, then spreading into eastern Ventura and Los Angeles counties (including the Hill and Woolsey burn areas) sometime between 0200 and 0900 hours.
 - The high intensity rainfall rates expected will likely bring roadway flooding as well as the threat of shallow mud and debris flows in the recent burn areas and rockslides in canyon roadways, including Pacific Coast Highway.

Active Weather Warnings, Watches and Advisories by County:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

Key Points

01/11/19 - 01/17/19

Friday-Saturday

- Rain and isolated thunderstorms across southern CA Friday night into early Saturday morning
 - Locally heavy rain with potential minor debris flow impacts over southern CA
 - Snow levels will drop to 5500 feet and may impact travel. 2-4 inches expected.
 - South to southeast winds 25-35 mph with wind gusts up to 50 mph may impact travel primarily along the I-5 corridor through the Grapevine in southern Kern County
- Dry conditions by Saturday afternoon and night

Sunday

- Dry conditions across the state through much of the day. Next round of rain will start move in late Sunday night

Monday-Thursday

- Increasing confidence in a very active weather pattern starting early Monday morning across the entire state
 - Potential for debris flow impacts across recent burn scars
 - Potential for significant travel impacts over the mountains due to snow
 - Potential for gusty winds
 - Confidence is high on the wet weather but low on exact location, timing and significance of any impacts
